

Otter Express Wants to Hear From You!

As Otter Express continues to grow, **we want your input**. We are actively evaluating opportunities to expand service throughout our region, and your feedback plays an important role in helping us determine where future public transportation services are needed.

Do you live in a community that doesn't currently have Otter Express service? We want to hear from you!

We are especially interested in hearing from residents of communities such as **Parkers Prairie, Battle Lake, New York Mills, Dent, Ottertail, Pelican Rapids, Foxhome, Rothsay, Erhard, Vergas, Dalton**, and many others throughout Otter Tail and Wilkin counties. Whether you need transportation for work, medical appointments, shopping, education, or other daily activities, we want to understand your transportation needs.

Otter Express tracks transportation demand and uses community feedback to help identify areas where expanded service may be beneficial. **Even if Otter Express does not currently serve your community, your input matters.** Every request helps us better understand regional transportation needs and supports future planning efforts.

If you would like to see Otter Express in your community, let us know. Tell us where you would like to travel, how often you would use public transportation, and what destinations are most important to you. Your feedback will help shape the future of public transportation in our region.

Together, we can build a transportation system that better serves the people of western Minnesota.

Otter Express – Moving Communities Forward.

Whether you're traveling across town, commuting to work, attending a medical appointment, visiting family and friends, or exploring your community, **Otter Express is public transportation for everyone.** We are proud to connect the communities of **Breckenridge, Fergus Falls, and Perham** with safe, reliable, accessible, and affordable transportation—and we look forward to growing with the communities we serve.

Have an idea for future service? We'd love to hear from you. Because the future of public transportation starts with your voice.
